## Type 3: Drawing a Clock With 12-Hour and 24-Hour Times

In some places they work on a 24-hour clock. On a 24-hour clock, midnight is 0000 hours, 2:00 AM is 0200 hours, noon is 1200 hours, and 1:00 PM is 1300 hours. This continues until 11:59 PM, which is 2359 hours. For the following 24-hour times, what time would that be on a 12-hour clock? Will it be AM or PM? Draw the analog clock.
